PROFESSIONAL SUMMARY

Seeking an entry-level role to leverage my skills in Full (MERN) Stack, Cybersecurity (CYWDA) and impactful digital solutions while growing professionally.

WORK EXPERIENCE

- Developed responsive full-stack web applications using the MERN Stack.
- Built and integrated RESTful APIs with MongoDB databases.
- Designed user-friendly and responsive web interfaces.
- Implemented authentication, CRUD operations, and API integration.
- Wrote clean, maintainable, and scalable code following best practices.
- Collaborated with team members and continuously learned new technologies.

PROJECTS

CodeCanvas

React.js, Node.js,

MongoDB(Mongoose), Github

- Developed a responsive personal portfolio website using React.js, Node.js, Express.js, and MongoDB.
- Showcased skills, projects, and achievements through a modern, user-friendly interface.
- Integrated backend functionality and managed data using MongoDB (Mongoose).
- Optimized website performance and ensured smooth navigation across devices.
- Used Git and GitHub for version control and project management.
